PROFESSIONAL SUMMARY

Results-driven Software Engineering student (Class of 2027) with 2 remote internship experiences and expertise in MERN Stack development. Proficient in building full-stack web applications, designing REST APIs, managing databases, and implementing secure authentication systems. Hands-on experience integrating AI-powered solutions, including LLM-based chatbots, to deliver intelligent and user-centric applications. Adept at problem-solving, collaborative development, and adapting to emerging technologies. Committed to developing scalable, high-quality software that addresses real-world business and user needs.

TECHNICAL SKILLS

Frontend	React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Context API
Backend	Node.js, Express.js, RESTful APIs, JWT Authentication
Databases	MongoDB (Mongoose), MySQL, Database Schema Design, XAMPP
AI / ML	Python, OpenCV, Streamlit, LLM Integration (OpenAI/Gemini APIs), Hugging Face
Tools & Platforms	Git, GitHub, Vercel, Netlify, Postman, Jupyter Notebook, VS Code, Docker, Adobe Illustrator, Flutter, Firebase
Concepts	MERN Architecture, REST API Design, Responsive Design, Agile Workflow, Parallel Processing, OOP, DSA, PF

PROJECTS

SkillSync — MERN Stack project collaboration Platform	— MERN	GitHub Live Demo
- Developed SkillSync, a MERN Stack web application that connects students with project opportunities and potential teammates based on skills and interests. - Implemented user authentication, profile management, project posting, and team request functionalities using MongoDB, Express.js, React.js, and Node.js. - Designed a responsive and user-friendly interface to streamline team formation and collaboration for academic projects and hackathons.		
AI PDF Reader & Question Generator	— Python, Streamlit, Hugging Face Transformers, BART, T5, PyPDF2	GitHub
- Developed an AI-powered PDF Reader and Question Generator that extracts text from PDF documents and generates summaries, questions, and MCQs automatically. - Integrated Transformer-based NLP models (BART for summarization and T5 for question generation) to create learning content with multiple difficulty levels. - Built an interactive web application using Streamlit for PDF upload, text processing, and real-time AI-generated educational outputs.		
Recipe Finder App	— Flutter, Firebase Authentication, Dart, Material Design	GitHub
- Developed a cross-platform Recipe Finder mobile application that enables users to discover, search, and explore recipes by meal categories including Breakfast, Lunch, and Dinner. - Implemented Firebase Authentication for secure user registration, login, password reset, and persistent user sessions, along with a personalized favorites system. - Designed an interactive and responsive user interface with animations, dark mode support, advanced recipe search, category filtering, and detailed step-by-step recipe instructions.		

Smart Alarm Management System — C++, Data Structures, File Handling

GitHub

- Developed a console-based Smart Alarm Management System in C++ that enables users to create, view, edit, delete, snooze, and manage multiple alarms efficiently.
- Implemented Linked Lists, Queues, and Arrays for dynamic alarm storage, scheduling, and time-based alarm triggering, ensuring efficient data management.

WORK EXPERIENCE

Full-Stack Developer Intern

Jun 2025 – Aug 2025

CodeAlpha — Remote

codealpha.tech

- Developed a responsive e-commerce store with a custom Admin Dashboard using HTML5, CSS3, and modern JavaScript (ES6+) as per the internship's foundational scope.
- Wrote modular, maintainable code following industry best practices — including separation of concerns, reusable utility functions, and clear documentation.
- Delivered assigned modules on schedule with clean, documented Git commits — demonstrating professional workflow discipline in a remote team setting.

Frontend Developer Intern

March 2026 – April 2026

Developers Hub — Remote

developershub.com

- Developed responsive and interactive user interfaces using React.js, BS, HTML, CSS ensuring smooth user experience across different screen sizes and devices.
- Collaborated with backend developers to integrate APIs and display dynamic data on the frontend while ensuring proper error handling and loading states.

EDUCATION

Bachelor of Science — Computer Science

Graduated June 2027

COMSATS University Islamabad, Sahiwal Campus

CGPA: 3.96 / 4.0

Relevant Coursework: Data Structures & Algorithms, Database Systems, Web Technologies, Software Engineering, Operating Systems, Computer Networks, Artificial Intelligence, Object-Oriented Programming.

CERTIFICATIONS

- Understanding Artificial Intelligence — DataCamp (Sep 2025)
- HTML builds a Website — MindLuster (Aug 2025)
- Web Development — WEBDEVELOPMENTCOURSE.IN
- Understanding ChatGPT — DataCamp

ACHIEVEMENTS & HIGHLIGHTS

- Awarded laptop under Prime Minister's Laptop Scheme (Pakistan) for outstanding academic performance.
- Achieved a CGPA of 3.96, reflecting consistent academic excellence.
- Secured top position in class projects, demonstrating strong technical and teamwork skills.
